The Innovations Pavilion

at GlassBuild America: The Glass, Window & Door Expo®

What Is It?

For the first time ever, **GlassBuild America®** will feature a special “Innovations Pavilion,” showcasing cutting-edge technologies and other groundbreaking advances from across the glass industry. Only companies meeting eligibility will be permitted to exhibit within the pavilion, which will be promoted heavily to attendees and the media.

Who May Exhibit?

Companies participating in the Innovations Pavilion must demonstrate advanced products, processes or services in one or more of the following categories –

- Energy conservation
- Solar energy
- Green products
- Design innovation
- New technology.

Why Should I Exhibit In the Pavilion?

The Innovations Pavilion will be one of the highlights of GlassBuild America, drawing excitement and interest from thousands of attendees, other exhibitors and the media. The area will be highlighted on all floor plans and marketed as a distinct, “must-see” destination for expo participants.

Several high-visibility conference programs will be held within or adjacent to the pavilion, attracting large groups of attendees throughout the week. A special presentation theater will be set-up just outside the area, adding to the buzz.

How Do I Sign Up?

For more information on prices, availability and to confirm eligibility in the Innovations Pavilion at GlassBuild America, please contact Jennifer Robinson of the NGA, at (770) 416-8023 or via e-mail at jennifer@glassbuildamerica.com.
